In the Specification:

Amendments to the Specification:

Please replace the paragraph on page 5, beginning at line 19 with the following amended paragraph:

In step **223**, the STP **202** passes the ORREQ INVOKE message to an SCP 411 **204**. The SCP 411 **204** returns an ORREQ RETURN RESULTS message **224** with relevant parameters [identifier, Length, AccessDeniedReason, and ActionCode]

Please add the following paragraph at page 8, line 19:

The location system **104** described above relies on various methods to determine a location of a mobile user such as: using an angle of arrival of a wireless signal from a subscriber, using a network generated location based on a centroid of a cell site sector's radio frequency (RF) polygon, using a time difference of arrival of wireless signals from said subscriber, using time of arrival of a wireless signal from said subscriber, using a known location of a cell/sector servicing said subscriber, etc.
